FEDERAL MILLWORK CORPORATION Newsletter

The President's Column

Not since the Performing Arts Center and the law offices of Osborne, Hankins et al., have we been privileged to be involved with a more beautifully crafted project. Our sincere congratulations to Irwin Goldberg, our Estimator, Project Manager and Engineer, who designed it, sold it and elevated Federal Millwork to national prominence.

The Architectural Woodwork Institute, through its national publication, *DesignSolutions*, featured the project in its Summer 2002 edition. The magazine has a circulation of more than 3000 reaching architects and designers across the country. We have received favorable calls from Kentucky, Minnesota, and California as well as numerous kudos locally.

The project, and our craftsmen, have been nominated for potential recognition by The Construction Association of South Florida for the prestigious Craftsmanship Awards.

The nominees, Andrew Della-Cerra, Paul Mowatt, and Victor Wacholder deserve the congratulations of the entire Federal Family. Chris Green played an equally important part in the beautiful finish achieved and is to be congratulated as well.

Richard Ungerbuehler, President

Federal Millwork Project in National Spotlight

The National Architectural Woodwork Institute honored Federal Millwork by featuring a 6 page article on the magnificent "Community Foundation Board Room" project in it's latest issue of the prestigious DESIGNSOLUTIONS Magazine. (Continued on Page 2)

FMC "JET" gets Laser Guidance System

Its been a year already? Yup! Our Italian made Busellato Jet 4002 XL CNC Machining Center has been on-line for a year. The "Jet" is designed for heavy duty routing, drilling, and machining of solid wood pieces and flat panels. It has been an invaluable tool that has greatly increased efficiency and expanded our manufacturing horizons. The Busellato has assisted us in accomplishing projects for The

Community Foundation, Alliance Capital, and dozens of items for individual orders! We are in the process of adding a new Laser upgrade that will make setup even faster and more precise! Combine the skill of our craftsmen and the speed and accuracy of the Busellato and there isn't anything we can't make!

What can we make for you?

Community Foundation

“The One & Only”
Irwin Goldberg
Project Manager

Because of the importance of the work conducted there, the Foundation’s board of directors wanted an elegant, traditional boardroom. FMC provided a floor to ceiling, wall to wall raised panel system with integral cabinetry, chair rail, base, and three piece crown assembly. The walls, cabinetry, and trim were milled from plain sliced hard Maple while quartered Maple veneer was used on the flat portions of the panels.

Although the entire room is clad in beautiful wood, the focal point of the room is the gorgeous custom-made conference table. The table measures 8 feet by 22 feet and incorporates four species of wood in varying width bands around a Maple Burl center. Radiating outward from the Burl is quarter cut Cherry, a narrow band of Walnut, followed by a section of Satinwood that houses eight pop-up computer connectors, another band of Walnut, and finally, an edge of plain sliced hard Maple.

We want to say a great big THANKS to some special folks that worked hand in hand with us to make this project a huge success!

Jim Marshiano, Project Manager, The Weitz Company
Beverly Pope Sears, COO Community Foundation

DID YOU KNOW?

Federal Millwork Corporation was the first Millwork Manufacturer in Florida to receive the Architectural Millwork Institute’s (AWI) highest quality rating ?

FMC is an AWI Premium Certified Shop!
