How can we help on your next project?

# CNC Machining

CABINETS, WALL PANELS, GRILLES, RADIUS PARTS, SOLID SURFACE COUNTERTOPS, and more! These are just a few of the projects that the Busellato CNC Machining Center can make in a fraction of the time it takes to do by hand. Draw the item in CAD, convert the image to G-code, download it to the computer control center, set the stock on the suction pods, stand back and watch it accomplish the job with accuracy and speed that could only have been dreamed about but a short time ago.

The highly trained and skilled Federal Millwork/Busellato technicians are providing assistance to AWI Millwork Shops all over Florida. By partnering with FMC, you can take advantage of technology that allows you to take on work that you otherwise would have been unable to bid. By utilizing FMC as a production partner, FMC can dramatically increase the size and scope of jobs that you can do. Seamless to the client, FMC becomes an extension of YOUR manufacturing facility.

FMC—AWI Premium Certified Woodwork

# Laser Machining

Federal Millwork has recently upgraded its Laser Department and now has 2 industrial laser systems. These systems are able to engrave almost any image on a stable solid surface such as GLASS, WOOD, TILE, VENEER, LEATHER, OR PLASTIC ... just to name a few!

The process starts by scanning your client's logo, artwork, or photograph into the system. We can also accept many graphics or CAD files on disk or CD, or we can develop the artwork from scratch if needed.

Take a look at just a few of the possibilities on this page and let your imagination soar. The possibilities are limitless. This is a whole new and exciting potential profit center for your firm and best of all, we will do all the work! Be assured that we are here to help you expand your opportunities, not steal your clients. Your trust will be maintained. Ask us for a quote today!
